MathsJam Shout

November 2026
East Dorset MathsJam, UK

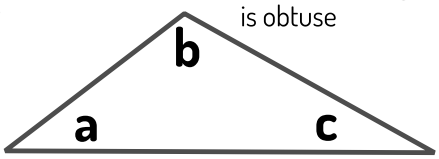

Puzzle
Tricky Triangle

Two lines are drawn at random angles between 0° and 180°. What is the probability that the three angles form an obtuse triangle?

Now ask some people in the pub to draw triangles: do they conform to the theory?

Obtuse triangle: at least one angle is obtuse

Puzzle
Sibling Rivalry

On average, do men or women have more sisters?

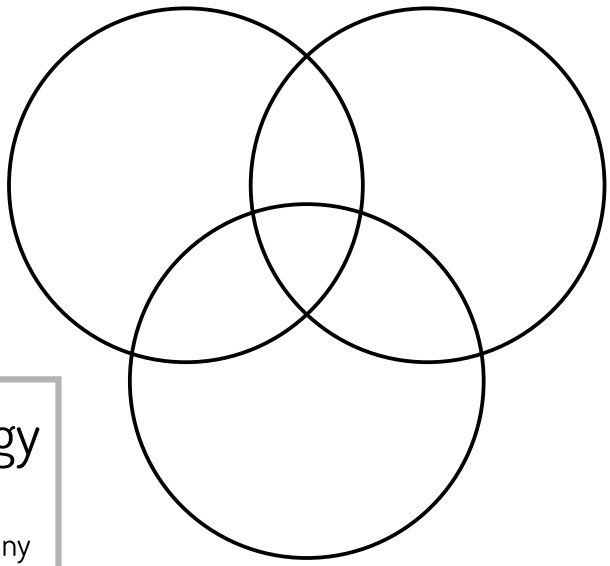

Play
Hexagons

a game for two players.

Print out the sheet of hexagons. Take it in turns to choose a hexagon. Winner is the first to get six in a straight line.

Printable PDF:
mathsj.am/hexagons

Puzzle
Venn's Vengeance

Can you place the numbers 1 to 7 in the different regions so that each circle has the same total?

How many solutions are there?

Puzzle
Dodgy Dice

Label 2 cubes, each face bearing any of the integers 0 to 6, to make a pair of dice that roll totals from 1 to 12 with equal probability.

(from 100 Brain Twisters, D. St P. Barnard via Martin Gardener's Mathematical Magic Show).

Make
Pop-up cube with six faces

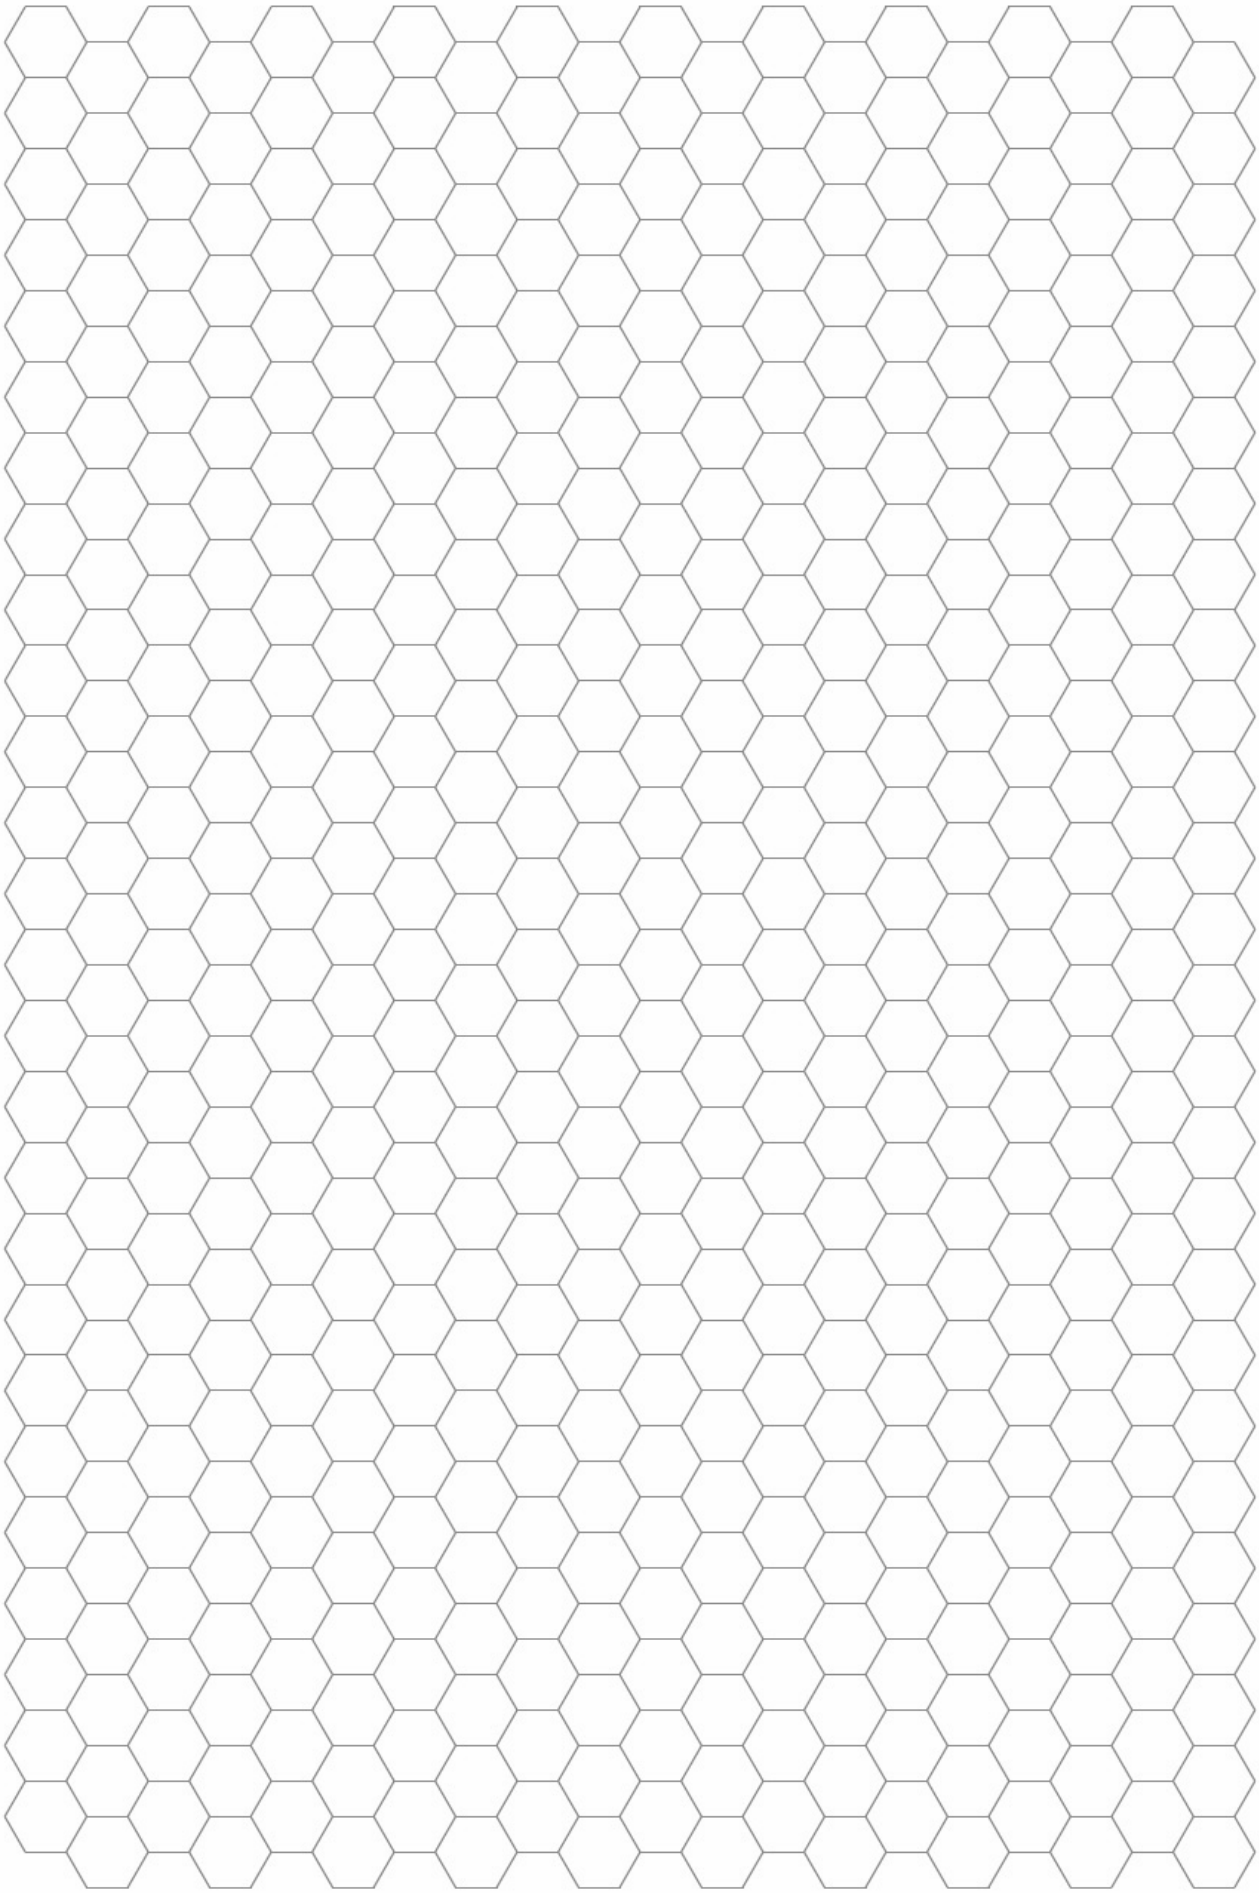

Draw a different face on each square (two faces are halved at the start). Follow the instructions to make your own pop-up cube!.

MathsJam Shout is a monthly sheet of ideas for activities to do at a MathsJam night. It's created using suggestions from a different MathsJam each month, and if you'd like to submit suggestions for a month in the future, email **katie@mathsjam.com**

Maths Jam is a monthly opportunity for like-minded self-confessed maths enthusiasts to get together in a pub and share stuff they like. Puzzles, games, problems, or just anything they think is cool or interesting. Monthly Maths Jam nights happen in over 70 locations around the world, on the second-to-last Tuesday of each month. To find your nearest Maths Jam, visit the website at **mathsjam.com.**

POP-UP CUBE WITH SIX FACES:

--------- = fold _____ = cut.

Draw a different face on each face. Glue tabs. Enjoy!
